

POSTGRADUATE PROGRAM IN NEUROSCIENCE FS 2023

B4: Molecular Aspects of Neurological Diseases

Tuesdays 16.15 – 18.00

Biozentrum, Hörsaal U1.141

Vorlesungs No. 12416

Datum	Topic	Speakers
07.3.23	Mitochondria and Neurodegeneration	Anne Eckert (UPK)
14.3.23	Drug Addiction	Matthias Liechti (DBM)
21.3.23	CNS Tumors Gliomas WHO grade II-IV	Gregor Hutter, Jean-Louis Boulay (USB/DBM)
28.3.23	Epilepsy Basics, Neuropharmacology, Molecular Aspects	Stephan Rüegg (USB)
04.4.23 Online	Depression Lecture given by Zoom	Claus Normann (Uniklinik Freiburg)
18.4.23	Hearing Impairment Tinnitus	Tania Rinaldi Barkat (DBM)
25.4.23	Neuromuscular unit	Christoph Handschin (Biozentrum)
02.5.23	Trauma Spinal cord injury	Josef Kapfhammer (DBM)
09.5.23	Childhood Ischemia	Catherine Brégère (DBM)
16.5.23	Stem Cells Embryonic and induced pluripotent stem cells A new tool to model diseases of the nervous system	Verdon Taylor (DBM)
23.5.23	Demyelinating Diseases Multiple Sclerosis	Anne-Kathrin Pröbstel (USB/DBM)
30.5.23	Stroke Ischemia, Neuroprotection	Urs Fischer (USB)
